

General description	A fine grain, air setting adhesive specially developed for bonding low and high porosity materials together. The superior adhesive qualities of CERAMGRIP is also ideal for attaching ceramic fibre products to refractory or metal and the joining of other lightweight insulation boards.
Recommend use	Suitable for bonding: Ceramic fibre Calcium Silicate Insulation Brick Fibreglass Textiles

APPLICATION DATA	
• Maximum service temperature (deg C)	• 1650
• Nominal thickness (mm)	• 2-3
• Covering m2.	• Approx 20m2 per 25kg pail
• Application method	• Trowel
• Storage in suitable conditions	• 6 months maximum
