

Furnace Technologies manufactures a wide range of bogie hearth furnaces which are suitable for the heat treatment of large loads in multiple configurations

Features

- ◆ Operates up to 1300°C
- ◆ Time from unload to quench less than 30 seconds for a 10 ton load
- ◆ Constructed from high strength refractory
- ◆ Heat resistant steel T-tracks support a wide range of loads
- ◆ Guaranteed sealing of the arc motion vertical doors due to their revolutionary design
- ◆ Integrated control system features programmable temperature control, independent over-temperature control and independent over-temperature protection
- ◆ Systems can be continuously monitored

Bogie furnaces can be custom designed to suit a wide variety of applications and different industries.

Optional features include:

- ◆ Can be made to heat using gas, oil or electrical elements
- ◆ Fully automatic load and unload features
- ◆ Automatic quench systems
- ◆ The ability to operate the furnace from multiple bogies
- ◆ Temperature recorders with connections for trailing thermocouples

Contact us for recommendations to assist in selecting the best system for your specific applications, site details and projected needs.
